

CIOB Ireland Awards 2025
18 September 2025 – Croke Park

Rising Star | Team of the Year | Client of the Year | **Sustainability Award**

The Sustainability Award celebrates those who have made their mark on sustainability within the built environment. The construction industry has started to take steps to become more sustainable by looking at new methods to cut down on waste as well as innovating new products that can help improve many facets of the building process.

Our CIOB Sustainability Award winner will have demonstrated their understanding of sustainable development whilst taking an active role in supporting communities. *Note: You may nominate yourself for this award, therefore the independent testimonial must come from someone outside of the candidate's organisation, with direct knowledge or experience of working with the candidate.*

Entry information

About the Nominator:

This is where you enter information about the nominator (name, email address, phone number).

About the candidate

Enter information about the candidate. You will also require to upload an image of the candidate: note that the face and shoulders of the candidate should occupy most of the space in the image. The camera should be at eye level. Aim for an image size of at least 1MB.

- Candidate's name
- Candidate's photo
- Candidate's organisation name
- Candidate's email address
- Candidate's phone number
- Candidate's address
- Type of business
- Business specialism (if appropriate)
- Why should you be considered for this award?

Testimony

This section is where you will enter a testimony. You will be required to enter:

- Who the testimony is from
- Their organisation
- Their email address
- Their contact number
- Independent testimony

Judges will be looking for:

- Workplace evidence to demonstrate your direct involvement in best practice in any area of sustainable construction (for example, net zero buildings, whole life carbon, climate resilience, energy efficient retrofit, circular economy, sustainable land use, biodiversity net gain or nature-based solutions, water management, sustainable procurement, developing sustainability knowledge, sustainable connectivity and transportation, sustainable communities and social value, or good health and wellbeing, etc).
- Use examples to demonstrate your understanding and experience of sustainable development and how you have implemented this in practice.
- Please indicate how you stand out from the crowd, relating your contribution to the UN Sustainable Development Goals (indicate which of the 17 goals you have contributed to through your work).
- Your examples must demonstrate that you have gone beyond compliance and should be supported by relevant quantitative and/or qualitative data.
